John,

Thanks for the follow-up email. I will check in with Naomi on how to proceed with these and get back to you at the end of this week.

Thanks,
Shea

Hi Jessica,

Can you let me know that you received the below email and if there is anything else you need from me for the 401 certification? If you would like to discuss the permits especially the new mercury limit for the Bad River WWTF, please let me know.

Thank you,
John

Subject: RE: Renewal applications due soon - 401 Certification Required

Hi Jessica,

Not sure how formal of a request you need from me regarding 401 certification for the three Bad River NPDES permits. Copies of the draft permits were sent out on 2/27/19. I also emailed copies of the permits to Philip on 2/28. Philip should have also forwarded on copies of the permit applications that were submitted to EPA for the facilities. So with this email, I am requesting 401 certification that the draft permits are protective of the Band's water quality standards. Please let me know if you need something more formal or if this email is sufficient. Also, let me know if you would like your own electronic copies of the permits and statements of basis. We should also set up a time to

discuss the process and whether it might be possible to public notice the permits and your decision on 401 certification together.

Please let me know if you have any questions.
John

Hi John,

Please request the certifications after you receive the applications from Phil.

Thanks,
Naomi

Sounds good Naomi. Are you going to have Phillip request the certification? If not, we will after we get the applications.

John

Hi John,

Thanks for sharing this. Jessica Strand will be our point of contact for the associated CWA section 401 certifications since she has my former position. I will be providing her guidance throughout the process.

Thanks,
Naomi

Subject: Renewal applications due soon

Hi Phillip,

The National Pollutant Discharge Elimination System (NPDES) permit for the Band's three wastewater treatment plants will expire on October 31, 2018. Pursuant to 40 CFR Part 122.21(d), filing an application for reissuance of a permit is required at least 180 days prior to the expiration date of the permit, unless otherwise specified by the permitting authority.

The forms (2A and 2S) for each facility can be downloaded, filled in, printed and signed and should be submitted to me by May 4, 2018. Let me know if you have any questions.

Thanks,
John
